Sunday: CLOSED

Vehicle Details

**2022 Zero SR/F 2022
538ZFDZ73NCK20243**

- Condition: Like New
- Payload capacity: 500lbs
- Empty weight:
- Floor length:
- Floor width:
- Side height:
- Body type:

If the instant torque that the SR delivers wasn't enough for you, the SR/F is sure to satisfy your need for speed. While you wait for only 1 hour for a full charge, you can think about the 124mph top speed you can hit, the 140 ft/lb of torque you'll send to the rear wheel and the 187 miles you can ride before having to recharge. This performance-oriented variant of the SR platform shines bright as an example of what an electric motorcycle can and should be. All while still maintaining features such as hill hold, cruise control, and different rider modes. A prime example of what the future of motorcycling holds. Low miles, garage kept, never down.

Additional Information:

500lbs Piggyback reservoir shock w/ adjustable spring preload Compression and Rebound damping
Bosch Advanced MSC Typical cost to recharge = \$1.94
